A lawyer by training, Marilyn has more time in the trenches as an industrialist than a litigator.

Since 2011, Marilyn has been a **Principal** of Eureka! Engineering LLC. Marilyn is the Managing Member of the consulting firm overseeing all things business, leaving the engineering to her colleagues.

From 2005-2011, Marilyn was the **Business and Program Manager** for the Manufacturing Industrial Council of Seattle (MIC) and its sister organizations the Duwamish TMA and Seattle Industry Foundation. She took the lead in assuring that the programs of the organizations were performed in accordance with the requirements of the contract or grant under which they were awarded. Marilyn acted as the liaison for businesses in the Greater Seattle area on issues involving governmental regulation, transportation infrastructure and workforce development. Additionally, the MIC publishes the periodical *Seattle Industry* magazine for which Marilyn was the **Managing Director**.

Prior to joining the MIC, Marilyn was a member of the MIC's **Executive Board** representing Ederer LLC, a 100+ year old crane manufacturing firm located in Seattle. Her background in industrial business in Seattle, especially manufacturing, were informed by her 18 years working for Ederer in a variety of roles including:

**Chief Operations Officer  
Project Management Manager  
Human Resources Manager**

**Strategic Sourcing Manager  
Contracts Manager  
Safety Officer**

**and, briefly (6 months), Acting Chief Financial Officer**

#### Representative project experience:

Process Improvement Programs while at Ederer included:

- \* MRP/ERP Installation and Conversion
- \* Vendor Qualification Program
- \* Lean Initiative
- \* Safety Program, and
- \* Governmental Procurement Qualifications.

MIC project oversight included the SODO Inc. training program developed for 18-24-year-old at-risk youth designed to expose them to the industrial trades. The program provided safety and job readiness training coupled with on-the-job internships at local industrial businesses. Partners for the program included King County Department of Human Services – Youth Source, Puget Sound Industrial Excellence Center of South Seattle Community College and the Aerospace Joint Apprenticeship Committee.

Provided contract oversight during the era of COVID for expansion of the successful Core Plus “shop” program taught in WA state high schools. Office of the Superintendent of Public Instruction (OSPI) endorsed the program in 2012. It now includes industry support from The Boeing Company (aerospace), the MIC (maritime) and AGC Education Foundation (construction).
